Gary-

Please populate the attached and return to the Republic rep that sent us this email.

I'll address their other questions.

Don

Don,

As attached, this profile has been returned as incomplete citing:

“If the analytical data on LS Laboratories Report HST 18100338 is to be used to characterize the waste, please have the generator include the representative sample ID #s on the profile.”

“The response to question three states, in part, ‘...some organic wastes may have been spilled inside the building, probable copper, lead or other minute metals.’ However, the analytical referenced as representative of the waste to be disposed includes data for PCBs only: how can the generator ensure the debris to be disposed is not contaminated with organics and/or metals?”

“Please have the generator provide a Third Party authorization for Don Edgington to respond on behalf of the US EPA.”

Attached is a Third Party Authorization form to be completed by the generator for your authorization to respond in their behalf. Also, attached is the initial profile form submitted that the analyst requires information to be added. Any information added to this profile must include an initial and date of an authorized individual(s).

Let us know if you have any questions.

Thank you,

Cheryl Muegge
Sales Coordinator - Special Waste

Please have the generator provide Third Party authorization for Don Degington to respond on behalf of the US EPA. If the analytical data on LS Laboratories Report HST 18100338 is to be used to characterize the waste, please have the generator include the representative sample ID#s on the profile.

The response to question three states, in part, " ? some organic wastes may have been spilled inside the building, probable copper, lead or other minute metals." However, the analytical referenced as representative of the waste to be disposed includes data for PCBs only: how can the generator ensure the debris to be disposed is not contaminated with organics and/or metals?

ROUTE INSTRUCTIONS:

This workflow is designed to support Special Waste Profile packages that are submitted by Coordinators. The workflow does the following:

- 1) The Special Waste Profile is routed to the Analysts Queue.
- 2) The Analyst reviews the Profile Package and either selects 01 - Approved the Request, 02 - Insufficient Information, or 03 - Inacceptable Material.
- 3) If options of 01 or 03 are selected (Approved or Rejected), the Coordinator is notified. If 02 - Insufficient Information is selected the Coordinator is assigned a workflow task to send the Analyst additional information.
- 4) Once the Profile is officially approved or rejected, the support document is named using an autopath and then moved to an archive folder.

STEP INSTRUCTIONS:

Please review the appended notes on the Special Waste Profile package for missing information. Please then email the missing information to the analyst that declined this Special Waste Profile package.
